

COMPANY API

INTRODUCTION

Endole Company API is a leading data solution, helping businesses create innovative, faster solutions with rich, real-time business data.

By granting complete RESTful access to one UK's largest business databases, Endole Company API helps you enrich applications with 10Y Full Financials, Shareholders, Group Structures, real-time Credit Scores, and more.

With instant access to over 100 in-depth data points, Endole helps businesses:

- Instantly evaluate company creditworthiness
- Create more informed sales and marketing campaigns
- Perform faster, automated KYC checks
- Refresh CRM with live, accurate data
- And more

GETTING STARTED

Getting started is free, meaning you can begin integrating corporate data into your app or website within three simple steps:

1.

Create a free developers account

2.

Create a free Endole API application

3.

Obtain your application key to begin performing API requests

Learn more about getting set-up by visiting our documentation here:
